

- To charge, plug the C type end of the charging lead into unit, plug the other end of the USB cable into the USB outlet or into a DS5V 3 pin adaptor (Not Supplied) then plug it into an electrical socket.
- Charging time is approx. 2.5 hours. When charging, the **red** light flashes. When fully charged the red light is constant. **See Picture 1**
- Charge prior to first use and at least once every 3 months to maximise battery life/conditioning.
- Ensure the unit always remains upright and is not turned upside down or onto its side.
- Remove protective label from the top of the unit that is covering the sensor light & spray nozzle. Dispose of the label, prior to first use. Keep sensor clean by cleaning with a lint free cloth. Do not use any force or harsh abrasive type material as this will damage the delicate sensor inside. **See Picture 2**
- Do not use the unit without filling with **MIST-IFY Instant Sanitiser** which is the only recommended chemical designed to work with this unit.

Picture 2

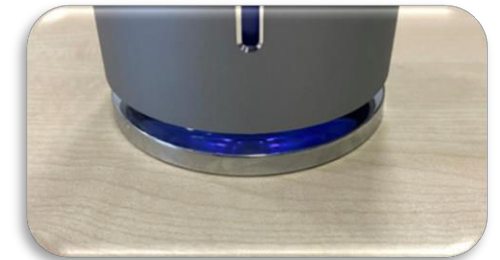

- To run, move the switch to the Induction setting and it will run the unit constantly. **See Picture 3**
- To activate sensor operated activation, move the switch to Auto (This is the recommended setting). The light will turn to a Purple/Blue light. **See Picture 4**
- To switch the unit off move the switch to the off position. **See Picture 3**
- Prior to first operation or if the unit has not been used for some time, move the switch several times through all the settings.
- Ensure the charging point is kept dry.
- The unit may take a few minutes to activate due to the filter absorbing the **MIST-IFY Instant Sanitiser**.
- The Filter can easily be replaced. Remove the Plastic housing and press the filter in place with a firm but gentle push fit. You can then replace the plastic housing which is a push fit.
- The Filter has a life span of 12 months using only our **MIST-IFY Instant Sanitiser** undiluted.
